

Senior Mineralogist

Baker Atlas division of Baker Hughes Incorporated has currently an opening for a Senior Mineralogist in Houston.

Type of job: Full Time

Education: A minimum of a MSc./BSc. degree in Geology or related discipline is required.

Company description:

Baker Atlas offers a complete range of downhole well logging services including advanced formation evaluation, production and reservoir engineering, petrophysical and geophysical data acquisition services. Baker Atlas services and information allow oil and gas companies to define, reduce and manage risk with advanced well logging and completion services for the exploration and production industry. The diverse range of services applies throughout the reservoir life cycle in support of the drilling process, during prospect evaluation and appraisal, to production and reservoir management.

Over the past five years Baker Atlas has substantially grown the Geoscience business. Today Baker Atlas is considered to be at the forefront of developments in formation evaluation technology and analysis. The crucial element that enables the application of this leading edge technology is the skillful petrophysical interpretation of wireline and LWD data meeting highest professional standards.

Job Description:

Responsibilities:

- Provide expert level support to the North America's geology and petrophysics community
- Support introduction of elemental neutron service in terms of mineralogical analysis of rocks, including core analysis, XRD, petrography and SEM data.
- Analysis of corresponding log readings and preparation of technical reports
- Participate in projects as sedimentology expert adviser
- Liaison with Technology & Research Venter and Marketing to refine and develop analysis of mineralogical services

Skill Requirements:

- Good interpersonal skills
- Able to work under tight deadlines
- Frequent travel will be required
- Experience with analytical methods for geochemical or mineralogical analyses including XRD, SEM and mass spectroscopy

Education/Experience Requirements:

- Preferred M.SC/PHD in Earth Science Discipline
- Min 4+ years experience in geology w/ emphasis on sedimentology, stratigraphy and depositional systems
- Possess solid background in sedimentary rock petrology and mineralogy
- Fluent in written and spoken English and capable of delivering presentations in English

We offer competitive salaries, immediate vacation and an attractive benefits package that includes medical, dental and life insurance, pension plan, and a 401k savings plan.
