

# **Cathodoluminescence and its Application to Geoscience**

Mineralogical Association of Canada  
Short Course Series Volume 45

Published by the  
Mineralogical Association of Canada (MAC)

*Edited by*

Ian M. Coulson  
Department of Geology  
University of Regina  
3737 Wascana Parkway  
Regina, Saskatchewan, S4S 0A2

Short Course sponsored by the Mineralogical Association of Canada,  
and delivered at the joint annual meeting of the GAC and MAC,  
Fredericton, New Brunswick, 19-20 May, 2014

## TABLE OF CONTENTS

Preface	ix
1. The physics and chemistry of cathodoluminescence	1
2. The calibration, optimization and avoidance of artifacts of a cathodoluminescence system	11
3. Cathodoluminescence hyperspectral imaging in geoscience	29
4. Applications of cathodoluminescence imaging to sedimentary rocks	47
5. Cathodoluminescence petrography of carbonate rocks: a review of applications for understanding diagenesis, reservoir quality, and pore system evolution	75
6. Cathodoluminescence as a tool in mineral exploration	97
7. Quartz cathodoluminescence: textures, trace elements, and geological applications	127
8. Cathodoluminescence of apatite	143
9. Trace element characterization of CL response in zircon by high spatial resolution LA-ICP-MS	169

## DETAILED LIST OF CONTENTS

<b>1. THE PHYSICS AND CHEMISTRY OF CATHODOLUMINESCENCE – ROGER MASON</b>	<b>1</b>
INTRODUCTION	1
ACTIVATION	1
ENERGY TRANSFER	4
QUENCHING	4
Thermal quenching	5
Quenching centres	5
Sensitization	5
EFFECTS OF COMPOSITION	5
Activators	5
Quenchers	6
Other compositional effects	7
Effects of heating	8
CONCLUDING REMARKS	9
REFERENCES	9
<hr/>	
<b>2. THE CALIBRATION, OPTIMIZATION AND AVOIDANCE OF ARTIFACTS OF A CATHODOLUMINESCENCE SYSTEM – MICHAEL ROBERTSON &amp; SANDRA GIBSON</b>	<b>11</b>
INTRODUCTION	11
COMPONENTS OF A CL SYSTEM	11
CALIBRATION OF A CL SYSTEM	15
Wavelength calibration	15
Spectral response calibration	16
OPTIMIZATION OF A CL SYSTEM	18
Light losses before exiting sample	18
Light collection alignment	19
Slit width and spectrometer resolution	19
Region of sample studied	20
Specimen field of view	22
CL IMAGING AND SPECTROSCOPY ARTIFACTS	23
Multiple order peaks	23
Long-lived CL emission	24
PMT hysteresis	26
False CL peaks	26
SUMMARY	26
REFERENCES	27
<hr/>	
<b>3. CATHODOLUMINESCENCE HYPERSPECTRAL IMAGING IN GEOSCIENCE – PAUL R. EDWARDS &amp; MARTIN R. LEE</b>	<b>29</b>
INTRODUCTION	29
OPTICAL-CL IMAGING	30
Instrumentation	30
Applications	30
SEM-BASED CL IMAGING	33
Instrumentation	33
Applications	33

SINGLE POINT CL SPECTROSCOPY	34
CL HYPERSPECTRAL IMAGING	34
Background to hyperspectral imaging	34
Advantages of hyperspectral imaging	36
Data Acquisition	36
<i>CL-HSI in general purpose SEMs</i>	38
<i>CL-HSI in electron microprobes</i>	38
Data analysis	39
<i>Image slices</i>	39
<i>Peak fitting</i>	39
<i>Principal component analysis</i>	41
Future developments in CL hyperspectral imaging	41
<i>Hyperspectral imaging in optical-CL</i>	41
<i>Time-resolved hyperspectral CL</i>	41
CONCLUSIONS	42
REFERENCES	42

---

<b>4. APPLICATIONS OF CATHODOLUMINESCENCE IMAGING TO SEDIMENTARY ROCKS –</b>	
<b>MELODY BECHBERGER AND IAN M. COULSON</b>	<b>47</b>
INTRODUCTION	47
INSTRUMENTATION AND SAMPLE PREPARATION	47
Optical microscopy–CL	48
SEM–CL	49
PROVENANCE INTERPRETATION	50
Feldspar	50
Cathodoluminescence causes and colors observed in feldspar	50
Cathodoluminescence textures in feldspar – zoning	55
Quartz	55
Causes of CL emission in quartz	55
Cathodoluminescence color of quartz as a provenance tool	55
Cathodoluminescence textures of quartz	56
Cathodoluminescence textures of quartz – volcanic quartz fabrics	56
Cathodoluminescence textures of quartz – plutonic quartz fabrics	56
Cathodoluminescence textures of quartz – hydrothermal quartz fabrics	56
Cathodoluminescence textures of quartz – metamorphic quartz fabrics	56
Mudrocks	58
Cathodoluminescence color of clay minerals	59
Cathodoluminescence of silt in mudrocks as a provenance tool	59
CATHODOLUMINESCENCE CHARACTERISTICS OF DIAGENETIC MINERALS	59
Mechanical compaction	59
Chemical compaction	60
Neomorphism	60
Cementation and replacement	60
Quartz cement	60
Feldspar cement	61
Carbonate cement	61
Carbonate cement – cathodoluminescence causes and colors in carbonates	61
Carbonate cement – zoning	62
Carbonate cement – cement stratigraphy and paragenesis	63
Clay cement	63

BIOGENIC MINERALS	64
Biogenic carbonate	64
Cathodoluminescence causes and colors in biogenic carbonates	64
Biogenic silica	65
Biogenic phosphates	65
MISCELLANEOUS APPLICATIONS	65
Zircon U–Pb dating	65
Archaeology and paleontology	65
Petroleum geology	66
Sedimentary ore deposits	66
SUMMARY	67
REFERENCES	67

---

**5. CATHODOLUMINESCENCE PETROGRAPHY OF CARBONATE ROCKS: A REVIEW OF APPLICATIONS FOR UNDERSTANDING DIAGENESIS, RESERVOIR QUALITY, AND PORE SYSTEM EVOLUTION – ERIC E. HIATT & PEIR K. PUFAHL** **75**

INTRODUCTION	75
Carbonate diagenesis overview	75
Cathodoluminescence in carbonates	77
METHODS	79
CL APPLICATIONS IN CARBONATE ROCKS	79
Cement stratigraphy and porosity evolution	81
Dolomite and dolostone	81
Dolomitization pathways	82
Mimetic dolomite and recrystallization of dolomite	84
Evolution of dolomite and hydraulic properties	89
SUMMARY	92
REFERENCES	92

---

**6. CATHODOLUMINESCENCE AS A TOOL IN MINERAL EXPLORATION – ANTHONY N. MARIANO AND ANTHONY MARIANO JR.** **97**

INTRODUCTION	97
FELDSPAR DIFFERENTIATION	98
CL IN PORPHYRY COPPER DEPOSITS	99
MINERAL IDENTIFICATION IN RARE ELEMENT DEPOSITS	99
CL IN RECOGNITION AND CHARACTERIZATION OF FENITIZATION	103
APATITE	104
GEMS	106
CONCLUSIONS	108
REFERENCES	109
PLATES	112

<b>7. QUARTZ CATHODOLUMINESCENCE: TEXTURES, TRACE ELEMENTS, AND GEOLOGICAL APPLICATIONS – BRIAN RUSK</b>	<b>127</b>
INTRODUCTION	127
CL TEXTURES IN QUARTZ	128
TRACE ELEMENTS ANALYTICAL TECHNIQUES	130
TRACE ELEMENTS IN QUARTZ	133
RELATIONSHIPS BETWEEN CL TEXTURES AND TRACE ELEMENTS	134
GEOLOGICAL APPLICATIONS OF QUARTZ CL AND TRACE ELEMENTS	136
REFERENCES	138
<hr/>	
<b>8. CATHODOLUMINESCENCE OF APATITE – ROGER MITCHELL</b>	<b>143</b>
INTRODUCTION	143
LUMINESCENCE OF RARE EARTH ELEMENT IONS IN CRYSTALS	143
ENERGY LEVEL DIAGRAMS AND SPECTRA	145
APATITE STRUCTURE AND RARE EARTH ELEMENT SUBSTITUTION	145
CATHODOLUMINESCENCE OF REE-DOPED APATITE	146
Cerium	146
Neodymium	147
Praseodymium	148
Samarium	149
Europium	149
Dysprosium	151
Terbium	151
Holmium	151
Erbium	152
Thulium	153
CATHODOLUMINESCENCE OF REE-DOPED GLASSES	153
EMISSION LINES OF REE ACTIVATORS IN APATITE	154
CATHODOLUMINESCENCE SPECTRA OF NATURAL APATITE	155
Yellow CL spectra of apatite from granite	157
Pink-violet apatite from alkaline syenite	158
Blue, violet, and lilac CL of apatite from carbonatite	159
CONCLUDING STATEMENT	163
REFERENCES	164
<hr/>	
<b>9. TRACE ELEMENT CHARACTERIZATION OF CL RESPONSE IN ZIRCON BY HIGH SPATIAL RESOLUTION LA-ICP-MS – CHRISTOPHER R.M. MCFARLANE</b>	<b>169</b>
INTRODUCTION	169
BACKGROUND	169
THE NATURE OF THIS STUDY COMPARED TO PREVIOUS WORK	170
SAMPLE DESCRIPTIONS	171
METHODOLOGY	171
RESULTS	172
Trace element concentrations	172
Patterns of CL emission	174
First order observations	174
Second order observations	177
DISCUSSION	178
CONCLUSIONS	181
REFERENCES	181
