

**SECONDARY ION MASS SPECTROMETRY  
IN THE EARTH SCIENCES:  
GLEANNING THE BIG PICTURE FROM A SMALL SPOT**

Mineralogical Association of Canada  
Short Course Series Volume 41

Published by the  
Mineralogical Association of Canada (MAC)

*Edited by*

Mostafa Fayek  
Department of Geological Sciences  
University of Manitoba  
Winnipeg, Manitoba, Canada, R3T 2N2

Short Course sponsored by the Mineralogical Association of Canada, and delivered at the  
the 2009 Joint Assembly of the AGU, GAC, MAC, CGU and IAH,  
Toronto, Ontario, 22-23 May, 2009.

## TABLE OF CONTENTS

Preface

1. An Introduction to Secondary Ion Mass Spectrometry (SIMS) in Geology	1
2. <i>In situ</i> Oxygen Isotope Geochemistry by Ion Microprobe	19
3. H, C, N and S Isotope Microanalyses by Secondary Ion Mass Spectrometry	65
4. Li, B and Cl Isotope Determination by SIMS	89
5. Quaternary Geochronology by SIMS	109
6. Improving Depth Profile Measurements of Natural Materials: Lessons Learned from Electronic Materials Depth-Profiling	133

\*Figures in the text marked with an asterisk have color versions available at <http://www.mineralogicalassociation.ca/index.php?p=160>

## DETAILED LIST OF CONTENTS

---

### 1. AN INTRODUCTION TO SECONDARY ION MASS SPECTROMETRY (SIMS) IN GEOLOGY

**Richard A. Stern**

INTRODUCTION	1
Brief Description of SIMS	1
SIMS ORIGINS	3
GEOLOGICAL (DYNAMIC) SIMS IN PRACTICE	5
Samples	9
Spatial Considerations	9
Data Essentials	11
Applications and Limitations	12
SUMMARY	13
REFERENCES	13

---

### 2. *IN SITU* OXYGEN ISOTOPE GEOCHEMISTRY BY ION MICROPROBE

**John W. Valley & Noriko T. Kita**

INTRODUCTION	19
HIGH PRECISION <i>IN SITU</i> ANALYSIS OF OXYGEN ISOTOPE RATIOS	20
MULTI-COLLECTOR ION MICROPROBES	21
IMS1280	23
Instrument bias and use of standards	24
Accuracy <i>versus</i> precision	26
Crystal orientation effects	28
X-Y effects	28
Analysis near grain boundaries	29
QUARTZ OVERGROWTHS AND CEMENTS	30
Mudstone	30
St. Peter Sandstone	31
FISH OTOLITHS	33
FORAMINIFERA	33
SPELEOTHEMS	36
METAMORPHIC AND HYDROTHERMAL SYSTEMS	37
GEM MINERALS	39
ZIRCON	40
$\delta^{18}\text{O}$ of mantle-derived magmas	41
Oxygen diffusion and exchange in zircon	42
Hydrothermal and metamorphic zircon	43
Crustal recycling	44
Maturation of the crust through time	45
Archean magmas and early Earth	45
Zircon as a record of the Kapuskasing Orogen	48
Hafnium, U-Pb and oxygen	48
METEORITES: OXYGEN THREE-ISOTOPES	48
Stardust	49
Martian meteorites	50
WHAT NEXT?	52
REFERENCES	53

---

### 3. HYDROGEN, CARBON, NITROGEN AND SULFUR ISOTOPE MICROANALYSES BY SECONDARY ION MASS SPECTROMETRY

**Mostafa Fayek**

INTRODUCTION	65
GENERAL PRINCIPLES OF SECONDARY ION MASS SPECTROMETRY	66
Isobaric interferences	67
Instrumental mass fractionation (IMF) and mass bias	68
Material selection for standards and sample preparation	69
STABLE ISOTOPE ANALYSIS BY SIMS	70
Instrumentation	70
Data presentation	71
RECENT APPLICATIONS	72
Hydrogen isotopic analysis	72
Volcanic glasses	72
Turquoise deposits	73
Carbon and nitrogen isotopic analyses	74
Carbonate cements	76
Early life	78
Sulfur isotope analysis	79
Mississippi Valley-type mineralization	79
Diagenetic studies and sedimentary sulfides	80
CONCLUSIONS	83
REFERENCES	83

---

### 4. LITHIUM, BORON AND CHLORINE ISOTOPE DETERMINATION BY SIMS

**Graham D. Layne**

INTRODUCTION	89
Li ISOTOPES	90
Instrumental approach	90
Precision and reproducibility	90
[Li] determination	91
Standards and matrix effects	91
Matrix dependence of IMF	91
Homogeneity of reference materials	94
Applications	96
B ISOTOPES	97
Instrumental approach	97
[B] determination	100
Standards and matrix effects	100
Matrix dependence of IMF	100
Homogeneity of reference materials	101
Applications	101
Cl ISOTOPES	102
Instrumental approach	102
Precision and reproducibility	103
Standards and matrix effects	104
Applications	104
SUMMARY AND CONCLUSIONS	105
REFERENCES	106

---

<b>5. QUATERNARY GEOCHRONOLOGY BY SIMS</b>	
<b>Axel K. Schmitt</b>	
INTRODUCTION	109
THEORY OF U-SERIES DATING	109
Principles and assumptions	109
Detection limits and datable materials	112
Secular equilibrium and detection limits	112
Zircon	112
Allanite	113
Opal	114
Other accessory magmatic minerals	114
Bulk sample $^{238}\text{U}$ - $^{230}\text{Th}$ analysis by SIMS	114
Applicable methods and time ranges	114
U-Pb	114
$^{238}\text{U}$ - $^{234}\text{U}$	115
$^{238}\text{U}$ - $^{230}\text{Th}$	115
$^{235}\text{U}$ - $^{231}\text{Pa}$	117
Other short lived chronometers	117
METHODS	117
Sample preparation	117
SIMS analytical conditions	118
Primary beam	118
Secondary ion species	118
Interferences	118
Detection	119
Data analysis	119
Data reduction and representation	119
Standards	120
Error assessment	121
Comparison with other <i>in situ</i> techniques	122
SELECTED APPLICATIONS	123
Time scales of magmatic processes	123
Large volume silicic systems	123
Basalt-dominated systems	123
Active geothermal reservoirs	124
Tephrochronology	124
Environmental studies	125
Climate change	125
Landscape evolution	125
FUTURE DEVELOPMENTS	125
REFERENCES	126

---

**6. IMPROVING DEPTH PROFILE MEASUREMENTS OF NATURAL MATERIALS: LESSONS LEARNED FROM ELECTRONIC MATERIALS DEPTH-PROFILING**

<b>Jerry L. Hunter, Jr.</b>	
INTRODUCTION	133
INSTRUMENTATION	134
DISCUSSION	135
Crater edge effects	135
PRIMARY BEAM EFFECTS	136
Collision cascade	136
Energy	136

CsM <sup>+</sup>	138
Effect of primary angle	139
Mass-cluster beams	140
TOPOGRAPHY	140
CONCLUSIONS	144
REFERENCES	146
